## May Highlights

- The continuing issues involving potential tariffs, global political uncertainty (now including Italy and rising interest rates all took turns swaying the markets positively and negatively.
- We believe economic indicators and statistics still leaning heavily in a positive direction.
- Domestic, small company stocks, as benchmarked by the Russell 2000 index, had a significant move to the upside; 6.07% for the month, resulting in 6.91% year-to-date.
